Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

CORRIGENDUM.

Calcutta, the 8th April 1950

The notifications under the heading "Applications for Patents" in the following issue of the Gazette of India, should be corrected as shown below :—

Gazette of India, Part II, Section 1, dated the 4th March, 1950—

Against No. 42700,—

for "G.M. Nabar and S.R. Ramchandran",

read "G.M. Nabar, R.S. Prayag and S. R. Ramchandran".

Applications for Patents

The dates shown in crescent brackets are the dates claimed under section 78-A of the Act.

23rd March 1950.

42868. B.K. Jana. B.O.C.S. binocular, colour and sight testing machine.

42869. The Tata Oil Mills Company Limited. Process for the preparation of resins from protein, lignin and oil, and plastic moulding compositions prepared from said resins.

42870. The British Tabulating Machines Company Limited. Improvements in and relating to calculating apparatus. (24th March 1949).

42871. The General Electric Company Limited. Improvements in or relating to luminescent materials. (24th March 1949).

Addition to No. 40692.

42872. M.B. Godbole. A lung-developer and tester.

24th March 1950

42873. B.N. Dutt. Utilisation of waste lubricating oil.

42874. Centrax Power Units Limited and R.H.H. Barr. Improvements relating to gas turbine power plants. (25th March 1949).

42875. C. Mayadas. Improvements in or relating to wheels of vehicles.

42876. R. Sonnevile. Improved railways sleeper of reinforced concrete with rail fastening bolts and method for making said sleeper.

42877. I.E.M. Adolphus. A wagon lock.

25th March 1950

42878. The Hedley Company Limited. Improvements relating to spectacle frames. (8th April 1949).

42879. Erskine, Heap & Company Limited. Improvements relating to electric circuit breakers. (26th March 1949).

42880. Compagnie Generale De Telegraphie Sans Fil. Improvements in or relating to multiple-element electric circuits. (2nd December 1949).

42881. OKULA, národní podnik. Spectacles.

42882. OKULA, národní podnik. Method of making spectacles.

42883. S.K. Karanjia. Improvements in and relating to brushes, particularly personal, hygienic, toilet and the like brushes.

42884. S.K. Karanjia. Improvements in and relating to brushes, particularly personal, hygienic, toilet and the like brushes.

27th March 1950

42885. Dr. J.S. Aggarwal, N.C. Budhraj and P. G. Sharma. Preparation of modified oils from semi-drying and other vegetable oils for use in paints and varnishes.

42886. K.N. Moorthy, D.S. Datar and S.H. Zaheer. Manufacture of manganese sulphate.

42887. Alexander Smith & Sons Carpet Company. Improvements in or relating to crimped fibre and method and apparatus for making the same.

42888. Societe Des Usines Chimiques Rhone-Poulenc. Improvements in or relating to the preparation of phenthiazine derivatives. (13th February 1950).

Addition to No. 36475.

42889. Bharat Battery Manufacturing Co., Ltd. Manufacture and use of organic expanders for negative plates of lead acid storage batteries which increase the capacity of the said batteries.

42890. The General Electric Company Limited. Improvements in or relating to tools for cold pressure welding. (28th March 1949).

42891. W. & T. Avery Limited. Improvements in weigh-bridges.

42892. W. & T. Avery Limited. Improvements connected with weigh-beams.

42893. Standard Telephones and Cables Limited. Signalling or control system for electrical circuits or equipments.

42894. Standard Telephones and Cables Limited. Improvements in or relating to signalling over electric pulse communication system. (30th May 1949).

42895. Bristol Repetition Limited and C. G. Arengo. Improvements in writing instruments. (26th April 1949).
42896. N.V. Philips' Gloeilampenfabrieken. Improvements in or relating to a transformer or choke having an airgap.
42897. Metropolitan-Vickers Electrical Company Limited. Improvements relating to railway vehicles. (1st April 1949).
42898. The P. & M. Co. (England) Limited. Improvements in pumps for rail greasing apparatus. (11th April 1949).

28th March 1950

42899. A.J. Kelman, Malayan Tin Dredging Ltd., Southern Malayan Tin Dredging Ltd., Tronoh Mines Ltd., Southern Tronoh Tin Dredging Ltd, and Ayer Hitam Tin Dredging Ltd. Improvements relating to dredging tin ore and other minerals.
42900. E. Gretener. A projection system for the projection of motion pictures.
42901. E. Gretener. Projection lamp for lenticulated film.
42902. N.V. Philips' Gloeilampenfabrieken. Improvements in or relating to electric discharge tubes comprising means for producing and deflecting an electron beam.
42903. N.V. Philips' Gloeilampenfabrieken. Improvements in or relating to electric incandescent lamps and fittings therefor.
42904. N.V. Philips' Gloeilampenfabrieken. Improvements in or relating to electric lamp holders.
42905. Standard Telephones and Cables Limited. Improvements in or relating to electrical wiring. (29th March 1949).
- Addition to No. 40244.*
42906. Standard Telephones and Cables Limited. Improvements in or relating to electrical wiring. (29th March 1949).
42907. Mavor & Coulson, Limited. Improvements relating to mining machines.
42908. T. G. Green and Company Limited, H.J. Smith, J.A. Johnson and E.A. Hawk. Improvements relating to the shaping of clay-ware.

29th March 1950

42909. N.D. Bharucha. Water appliance featuring automatic stoppage of water.
42910. Cyc-Arc Limited. Improvements in and relating to apparatus for electric arc stud welding. (6th April 1949).
42911. C. Vijayaraghavan. Improvement of glass ink bottle.
42912. Metallgesellschaft Aktiengesellschaft. Process and apparatus for tapping liquid slag from pressure gas producers. (23rd August 1949).
42913. C.O. Royrko. Mechanical foot-ball game.
42914. Stanolind Oil and Gas Company. Separation of organic oxygenated compounds from hydrocarbons.
42915. Parke, Davis & Company. Amino ethers.
42916. Chas. Pfizer & Co., Inc. Improvements in or relating to the streptomycin compounds and the preparation thereof.

Alteration of Date

40432. The claim to priority date 22nd October 1947 has been abandoned and the application dated as of 22nd October 1948, the date of filing in India.
41532. The claim to priority date 14th June 1947 has been abandoned and the application dated as of 13th June 1948, the date of filing in India.

Applications Accepted.

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications, referred to below, may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Manager of Publications, Civil Lines, Delhi, and also on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Re. 1 (postage extra if sent out of India). Requisition for the supply of printed specification should be accompanied by the numbers of the specifications as shown in the following list.

If required typed copies of the specifications, together with copies of drawings, if any, can be supplied by the Patent Office, on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under section 78-A of the Act.

40150. M.G. Andersen. Liquid atomizer. Accepted on 25th March 1950.

Burner with passages in communication, with intersecting liquid and air atomizer passages and a vaporizer heated by combustion of combustible material emerging through an outlet passage of the burner.

40314. A. Singh. Improvements in or relating to typewriters for Hindi, Devnagri and like scripts and keyboard for same. Accepted on 25th March 1950.

Mounting means for deadkey type bars in the type bar segment consists of notches, each notch is provided with two sloping faces.

40315. A. Singh. Improvements in or relating to typewriters for Hindi, Devnagri and like scripts and particularly to means for securing the type bars. Accepted on 25th March 1950.

Typebodies fitted to the type bars extend more towards right or left of the type bar ends wherein the notches in the type bar segment have different inclinations.

40326. A. Singh. Improvements in or relating to typewriter and particularly to means for operating the carriage. Accepted on 24th March 1950.

Provided with two type guides characterised in that on operation of the deadkey, the universal actuates the dog to shift out of contact with the escapement wheel.

40327. A. Singh. Improvements in or relating to typewriters. Accepted on 24th March 1950.

Means are provided for the type bar to move the carriage in single step to provide full space between two letters and this effected when the type bar is raised and before it strikes the roller.

40432. John Laing & Son Limited. Improvements in and relating to the production of cellular concrete blocks and the like, and composition therefor. Accepted on 25th March 1950.

Composition comprise portland cement, pulverised fuel ash, sand, finely divided metal powder, alkali, and a water soluble cellulose compound with a wetting agents.

40446. I. O. Ruud. Improvements in electro-magnetic driving system for hair-cutting machines, safety razors or the like. Accepted on 25th March 1950.

Electro-magnet & permanent magnet impart reciprocating motion to swing lever according to frequency of alternating current employed

40452. J. N. Davies. New or improved apparatus for shaving. (29th October 1947). Accepted on 26th March 1950.

Provided with means for supplying liquid to the skin in advance in the path of the blade and means for interrupting or restricting such supply.

40516. The General Electric Company Limited. Improvements in and relating to carrier tele- systems. (11th November 1947). Accepted on 27th March 1950.

Two or more stations transmit signals on band of frequencies and receive signals on band of frequencies.

Corporation. Improvements in or relating to fasteners and to strips of fastener blanks. Accepted on 24th March

Providing a bar portion constituting a head in integral leg portion offset to one side of the bar.

Processes Limited. Improvements in or relating to the walls of buildings. Accepted on 3rd March 1950.

Vertical panels being maintained in a state of lateral compression by tightening means, and tightening means being provided for pair of adjacent pillars.

& Marles Bearing Company Limited and Hickling. Improvements in or relating to anti-friction bearings. Accepted on 24th March 1950.

A grease-fluid or seal is formed with a wing lip of convex shape.

& Marles Bearing Company Limited, and Hickling. Improvements in or relating to anti-friction bearings. Accepted on 24th March 1950.

The periphery of the grease shield being of a shape to act as a safety device to prevent axial displacement.

Edroy and L. G. Pimblett. An improved glass pane window. (29th January 1948). Accepted on 26th March 1950.

Lower and upper panes are slidable along channels of composite side members where vertical members with inserts are fitted to said members for pressing against sliding

Levis & Company. Derivatives of amino acids and methods for obtaining the same. Accepted on 24th March 1950

A lamidoacetophenone derivative containing a hydroxyl group in phenyl ring is condensed with formaldehyde to obtain ketonic amino alcohol which is thereafter reduced and hydrolysed to obtain nitro phenyl-2-acylamide-propanol.

Method. A process for the extraction of rubber gum from "Urginia Indica". Accepted on 27th March 1950.

Method. Peeling onions in solution of pressing them then relieving same of water soluble residue, thereafter drying the scales.

Method. Coulson Limited. Improvements in the apparatus for mining machines. Accepted on 24th March 1950.

Method. A series of grippers gripping haulage rope alternately and power unit moving one gripper back and forth relative to other in time

with movement and stoppage of travel of mining machine; each gripper automatically releases rope as other grips it.

41532. D.H. Smith. Improvements in and relating to cooling cabinets. Accepted on 25th March 1950.

Consists of a perforated water wall, with a fabric curtain lining the perforated outer wall on inside and a container for water.

41659. American Bosch Corporation. Fuel injection pump. Accepted on 23rd March 1950.

A reciprocable plunger to pump fuel through distribution bore to plurality of outlets automatically controlled by governor fitted in one housing.

41746. O. Becker. Body supporting metal tube furniture. Accepted on 29th March 1950.

Comprising a central element and two side elements formed by circumvolutions of a metal tube in a vertical plane.

41760. C.W.H. Den Bak and R.R. Laupman. Rubber cushion. Accepted on 29th March 1950.

Characterized in that cells and cell walls have such dimensions that cell walls will flex before being elastically compressed when vertical pressure is applied.

41918. N.V. Phillips' Gloeilampenfabrieken. Improvements in or relating to voltage-comparison devices for use in an automatic signalling system. Accepted on 27th March 1950.

Comprising two discharge tubes to whose control-electrodes are fed potentials to be compared, the common cathode circuit of the tubes including a high resistance and the anode circuit of at least one valve controlling a relay to energize or de-energize if the potentials to be compared are substantially equal.

41930. K.N. Moorthy and Director Central Laboratories for Scientific and Industrial Research, Hyderabad Deccan. A process for quick extraction of glue from bones. Accepted on 29th March 1950.

Subjected to high pressure steam of 40 lbs. for five minutes and to 30 lbs. for half an hour and then glue is extracted in about four hours and then glue is extracted in about four

41943. R.F. Warry Limited. Cable tensioning means for hoists. Accepted on 23rd March 1950.

Characterised by the provision of means to take up surplus length of cable as it is unwound from the drum due to the drum over-running the stopping of the platform at its lower terminus.

41986. Scammell Lorries Limited. Mounting and suspension of steering road wheels of motor vehicles. (15th September 1948). Accepted on 25th March 1950.

In which steering mechanism is mounted and combined with a front wheel suspension in such manner as to permit relative movement between the wheel axle and the frame for absorbing road shocks.

42053. C. & J. Clark Limited. Improvements in or relating to lasts and trees for boots and shoes. (22nd October 1948). Accepted on 29th March 1950.

Comprising a front portion and a two-part rear portion characterized in that lower rear part takes forward movement when upper rear part rocks towards front portion.

42083. J. Ruetz. Closure device for containers, such as bottles, tubes, cans and the like. Accepted on 24th March 1950.

Includes a bead on top of the container running parallel to the plane of the mouth of the container the lower longitudinal faces of which bead form guides for a sliding members.

42142. Koninklijke Industriële Maatschappij Voorheen Noury & Van Der Lande N.V. Manufacturing 1. 2. 3. 4. 5. 6. hexachlorocyclohexane. (27th October 1948). Accepted on 28th March 1950.

Chlorination of benzene without the need of exposure to radiation, employing 50 per cent. of the water in the form of ice.

42146. Koninklijke Industriële Maatschappij Voorheen Noury & Van Der Lande N.V. Process for the chlorination of acetic acid. (30th April 1949). Accepted on 29th March 1950.

Passing a mixture of sulphur dioxide and chlorine into acetic acid in the presence substances promoting the formation of sulphuryl chloride.

42147. Rose, Downs & Thompson Limited. Improved method and apparatus for the extraction of oils from vegetable matter such as seeds, nuts and beans. (1st November 1948). Accepted on 24th March 1950.

By conveying a slurry consisting of pulverised raw material and solvent, through a plurality of zones of differential pressure.

42150. Standard Telephones and Cables Limited. Improvements in or relating to electric trigger circuits employing semi-conductors. (27th October 1948). Accepted on 24th March 1950.

Comprising means for coupling the input or output circuits of the crystal triode so as to introduce positive feedback between said circuits, means for applying an input pulse to an electrode of the crystal triode in order to switch it from low current to high current condition, or vice versa, and means for deriving an output pulse.

42268. W. Plampin. An improved method of manufacturing horse shoes. Accepted on 29th March 1950.

Introducing a hard metal strip into a longitudinal groove of a straight length of light alloy and bending the light alloy to required shape.

42361. Construction Mecaniques S. A. Renens and E. Zurmühle. Improved railway-track sleeper-tamping machine. Accepted on 28th March 1950.

Machine in which tamping tools in pairs are advanced towards each other and simultaneously by vibrated is characterised in that the tools are advanced and retracted through hydraulic driving means.

42402. C. A. Ewing. Improved implement for and process of skiffing or plucking and collecting tea leaf or the like. Accepted on 24th March 1950.

Cutting knife in combination with rotor with blades, rotor being driven by a clock work driving mechanism through the medium of a flexible drive.

42420. The Mennen Company. Package for dispensing powder. Accepted on 22nd March 1950.

Comprising auxiliary chamber containing beads.

42438. Kwikform Limited. Improvements in or relating to shuttering for use in forming arched roofs and other curved concrete and like structures. (11th January 1949). Accepted on 29th March 1950.

Shuttering comprises of a plurality of shuttering plates each formed of a flexible metal sheet, reinforcing members extending at intervals along the surface of each sheet, and means for detachably securing the sheets.

42448. Lever Brothers & Unilever Limited. Improvements in or relating to germicidal detergents. (31st December 1948). Accepted on 28th March 1950.

Detergent containing up to 6 per cent. of 2:2' dihydroxy halogenated diphenyl ether.

42461. Aktiebolaget Svenska Kullagerfabriken. Sheet metal plummer block. Accepted on 24th March 1950.

Two housing halves engaging in plane perpendicular to shaft, with thin edges turned outward to form flanges received in groove in yoke embracing them; feed formed by banding yoke ends embraced by ends of base plate backwards.

42484. The International General Electric Company Inc. Improvements in or relating to method of fabricating sealed envelopes of electric discharge devices. Accepted on 22nd March 1950.

A thin metal sealing ring positioned between open end of bulb portion and edge portion of moulded closure member and the ring treated inductively to cause fusion thereof with adjacent glass portions.

42508. Murphy Radio Limited. Improvements in radar and like apparatus. Accepted on 22nd March 1950.

Comprising a strobe pulse generator set in action by, or simultaneously with, the emitted pulse, and governed by capacitance-resistance circuit to produce pulses, a gate valve to which strobe pulses and response pulses are applied and means governed by pulses in the anode circuit of gate valve to restore the charge of the capacitance.

42515. R. Rummel. Process for winning metals, especially raw iron. Accepted on 27th March 1950.

Iron ore with fuels introduced into liquid slag.

42516. C. D. Patents Limited. Heat exchanger. (14th January 1949). Accepted on 23rd March 1950.

Consists of a body composed of carbon having two rows of passages at right angles.

42520. International General Electric Company, Inc. Improvements in or relating to radio receiver. Accepted on 25th March 1950.

For selectively receiving amplitude-modulated signals or frequency-modulated signals characterised by a dual purpose signal translating stage comprising an electron discharge device.

42546. Thomas Dawson (Shuttlemakers) Limited. Improvements in hand-threading shuttles for looms. Accepted on 23rd March 1950.

Shuttle eye consisting of a thin disc having a vertical slot extending from top to the centre, the disc being located in a recess in the shuttle head.

42557. Godrej & Boyce Manufacturing Company Limited. Improved manner of constructing safes and the like. Accepted on 29th March 1950.

Bending edges which are already twice bent to form a U-shape to a third and a fourth bending to cause last liner portion of the front edges to be parallel to top, sides or bottom part to which they are integrally attached.

42616. Westinghouse Brake & Signal Company Limited. Improvements relating to vacuum hose couplings. (3rd March 1949). Accepted on 24th March 1950.

Coupling head has a groove or slot for engagement by projecting horn of the mating coupling head forming the other half of the coupling.

42729. H. Linde. A dust cart. Accepted on 29th March 1950.

Two or more swingable arms carrying distributing member at their lower ends are oscillatorily journaled in bearings provided above collecting container.

Printed Specifications Published

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The date shown in each entry is the date of registration of the designs included in that entry.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.
